DETAILED ACTION

Claims 1-9 have been presented for examination.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Misra et al., U.S. Patent No. 5,757,920 and Misra hereinafter).

Regarding claim 1, Misra discloses a certificating system, comprising:

a registering device registering common certificate information in common with a plurality of services (Col. 6, lines 40-63);

a receiving device receiving certificate information of a user when the user accesses a particular service of the plurality of services (Col. 6, lines 63-67 and Col. 7, lines 1-6 and Col. 9, lines 9-60);

a determining device determining whether or not the certificate information of the user corresponds to the common certificate information, and a permitting device permitting the user to utilize the particular service when the certificate information of the user corresponds to the common certificate information (Col. 7, lines 6-21 and Col. 9, lines 9-60).

Art Unit: 2131

Regarding claims 2 and 3, Misra discloses further comprising:

a storing device storing identification information and password information for the particular service (Col. 6, lines 63-67 and Col. 7, lines 1-7);

a certifying device certifying the user based on the identification information and the password information, and an issuing or invalidating device for issuing or invalidating the common certificate information to the user when said certifying device has successfully certified the user (Col. 6, lines 40-67 and Col. 7, lines 1-21).

Regarding claim 4, Misra discloses further comprising:

an available service managing device registering the plurality of services as available services with the common certificate information (i.e., the domain controller of a domain holds both the authentication credentials and authorization information for each of the users and machines)(Col. 5, lines 9-45).

Regarding claim 5, Misra discloses a terminal unit, comprising:

a transmitting device transmitting common certificate information in common with a plurality of services when a user accesses a particular service of the plurality of services (Col. 9, lines 43-54), and a service utilizing device providing the particular service to the user when the user has been successfully certified based on the common certificate information (i.e., each domain controller holds information about users and

Art Unit: 2131

machines for which the domain is the home domain)(Col. 4, lines 45-65 and Col. 6, lines 40-67 and Col. 7, lines 1-67 and Col. 8, lines 1-65).

Regarding claim 6, Misra discloses a computer-readable recording medium on which a program for a computer is recorded, said program causing the computer to perform:

receiving certificate information of a user when the user accesses a particular service of a plurality of services (Col. 6, lines 63-67 and Col. 7, lines 1-6 and Col. 9, lines 9-60);

determining whether or not the certificate information of the user corresponds to common certificate information in common with the plurality of services, and permitting the user to utilize the particular service when the certificate information of the user corresponds to the common certificate information (Col. 7, lines 6-21 and Col. 9, lines 9-60).

Regarding claim 7, Misra discloses a certifying method, comprising:

pre-registering common certificate information in common with a plurality of services (Col. 4, lines 30-67 and Col. 5, lines 1-21);

determining whether or not certificate information of the user corresponds to the common certificate information when the user accesses a particular service of the plurality of services, and permitting the user to utilize the particular service when the

Art Unit: 2131

certificate information of the user corresponds to the common certificate information (Col. 7, lines 6-21 and Col. 9, lines 9-60).

Regarding claim 8, Misra discloses a certificating system, comprising:
registering means for registering common certificate information in common with
a plurality of services (Col. 6, lines 40-63);

receiving means for receiving certificate information of a user when the user accesses a particular service of the plurality of services (Col. 6, lines 63-67 and Col. 7, lines 1-6 and Col. 9, lines 9-60);

determining means for determining whether or not the certificate information of the user corresponds to the common certificate information, and permitting means for permitting the user to utilize the particular service when the certificate information of the user corresponds to the common certificate information (Col. 7, lines 6-21 and Col. 9, lines 9-60).

Regarding claim 9, Misra discloses a propagation signal for propagating a program to a computer, the program causing the computer to perform:

receiving certificate information of a user when the user accesses a particular service of a plurality of services (Col. 6, lines 63-67 and Col. 7, lines 1-6 and Col. 9, lines 9-60);

determining whether or not the certificate information of the user corresponds to common certificate information in common with the plurality of services, and permitting

Art Unit: 2131

the user to utilize the particular service when the certificate information of the user corresponds to the common certificate information (Col. 7, lines 6-21 and Col. 9, lines 9-60).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ross et al., U.S. Patent No. 5,553,143,

Ramasubramani et al., U.S. Patent No. 6,233,577,

Reardon, U.S. Patent No. 6,212,635,

Martineau et al., U.S. Patent No. 5,893,910, and

Wyman, U.S. Patent No. 5,260,999.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arezoo Sherkat whose telephone number is (703) 305-8749. The examiner can normally be reached on 8:00-4:30 Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ayaz Sheikh can be reached on (703) 305-9648. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
